Fabric Cover Colours:

Synergy*

Synergy FR* Flame Retardant

Colours may not be exactly as shown. Contact your local dealer to see fabric samples.

- All welded material is protected from the inside out.
- Hot dip galvanizing provides lifelong corrosion protection for steel.
- Hot dip galvanizing, as opposed to spray galvanizing, results in a coating that is bonded to the steel.
- Competitor buildings that do not have post-welding hot dip galvanized trusses will eventually rust from the inside out.
- Hot dip galvanized parts also available.
