

BRITESPAN™

BUILDING SYSTEMS INC

Agricultural Building Solutions

Barns, Equipment, Livestock or Commodity

Britespan offers the widest product line in the fabric building industry, with engineered structures from 24' to 300' wide to any length. We provide building solutions for every application that are efficient to build and have lower ongoing operating costs than traditional buildings.

Britespan's authorized dealers are industry experts and local to our customers, providing project management from concept to completion.

Superior Air Quality, Ventilation and Natural Lighting

Britespan buildings provide a bright and comfortable environment for livestock and also a bright and open storage space for your equipment and your crop.

The semi-translucent covers allow for natural daylight to pass into the building, reducing or eliminating daytime lighting costs, and the clearspan design provides superior air quality and ventilation, creating a comfortable and healthy environment for livestock.

The height and clearance also allows for easy access to your hay, crop, or commodities and convenient handling by farm machinery.

Britespan fabric buildings are extremely popular for use as cattle barns as they offer tremendous performance advantages over conventional buildings, including increased milk production, and increased daily gain from their cattle.

With a riding arena from Britespan, you can ride and train year round, regardless of weather conditions. With no interior columns our structures allow you to utilize as much space as possible. With the sound-absorbing quality of the fabric covers, outside noises are reduced and there is no indoor echoing, providing a peaceful, stress-free environment for riders and horses.

Building Accessories

Doors

Multiple door styles are available, and can be installed at end or side walls to permit the proper traffic flow.

Eaves

Eaves are available to direct snow and rain away from your building, ideal for outdoor feedbunks.

Foundations

A variety of engineered foundation options available that can either be permanent, temporary, or entirely portable.

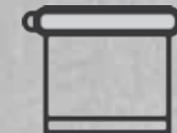

Chimneys

Exhale warm air and moisture, increasing ventilation and improving air exchange with chimneys.

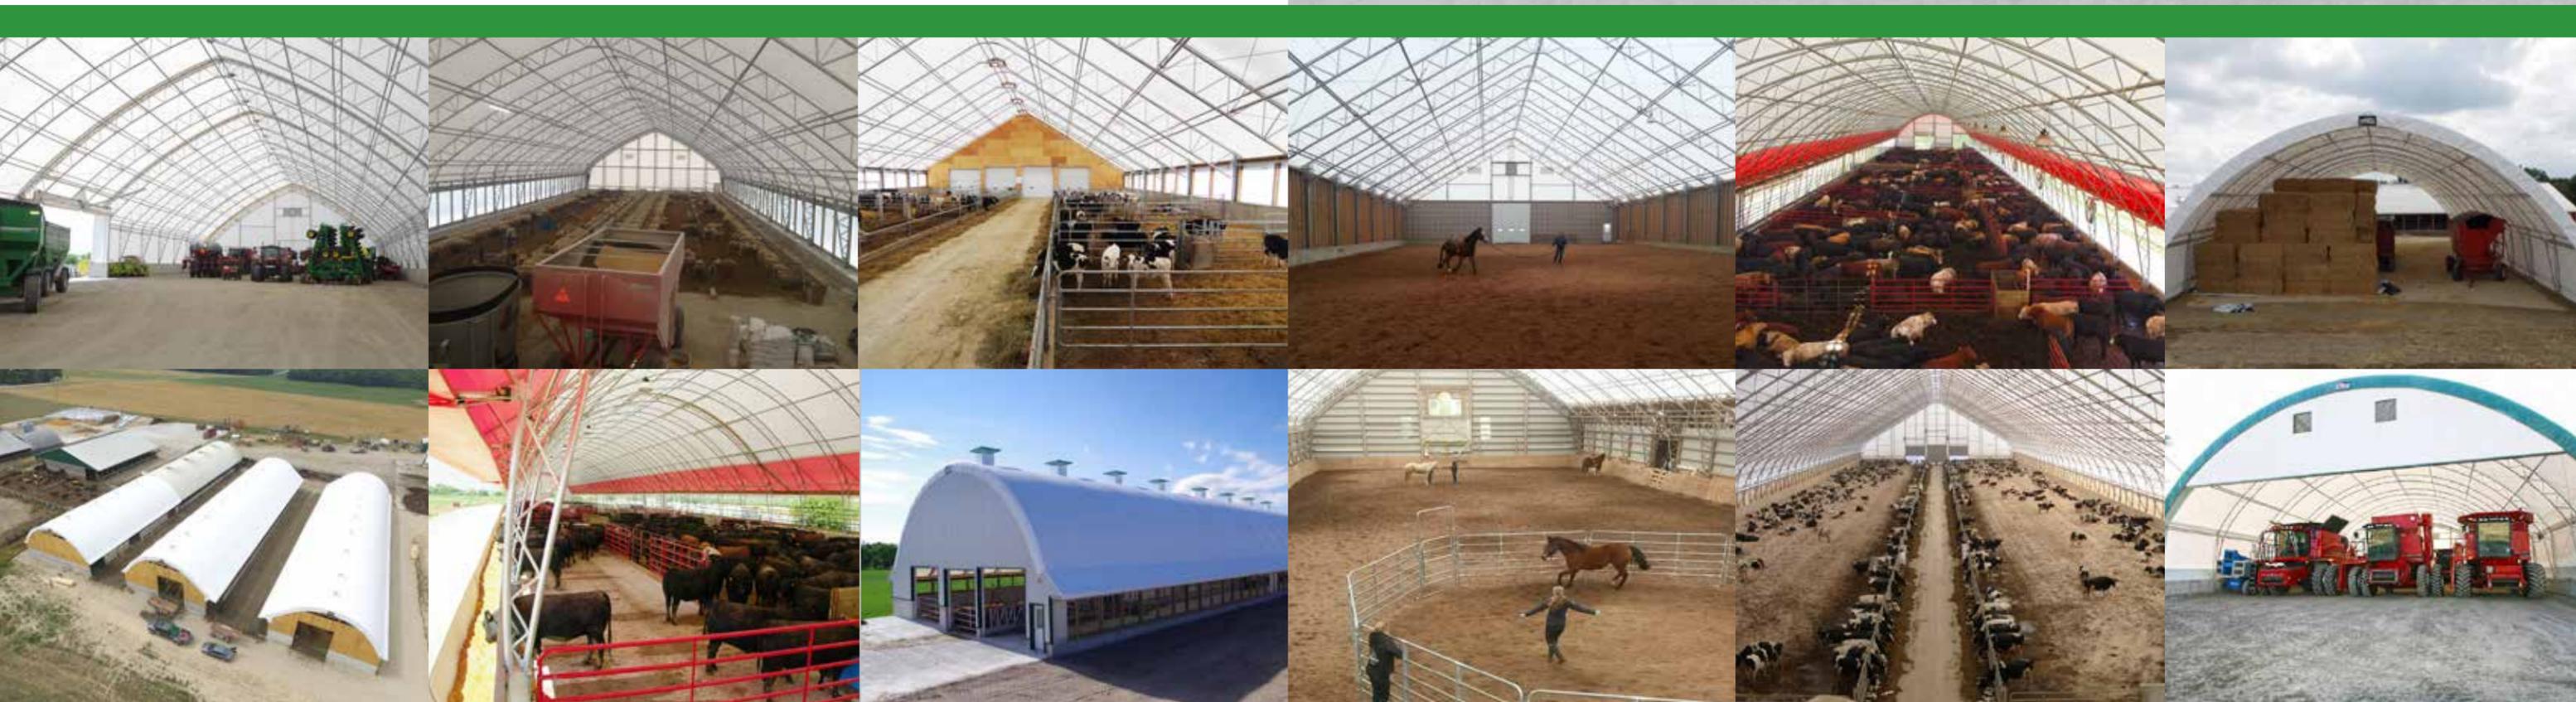

End Walls

End walls can be configured in a wide variety of options including full fabric, partial end walls, steel clad, wood finished and more.

Curtains

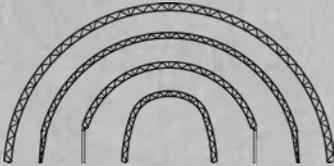

Curtains are easy to install and provide increased ventilation and improved herd health.

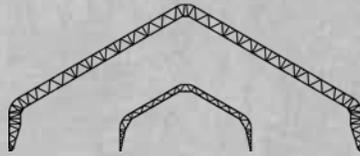

Building Series

Britespan has been in the fabric building industry since 1994, offering the widest product line available today. We design, engineer and manufacture each product line in-house.

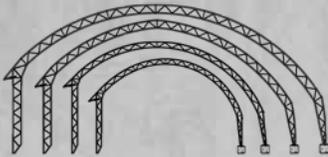

Our structures are engineered to be portable, temporary or permanent, with rapid installs even in remote areas.

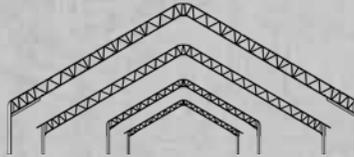

Atlas Series
24' - 108' wide

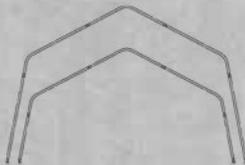

Genesis Series
80' - 200' wide

Contact us for details on our full line of colour options or to request fabric samples.

Why Britespan?

HOT DIP GALVANIZING
Post-weld hot dip galvanizing bonds to steel to provide lifelong corrosion resistance from the inside out.

VENTILATION
Large volumes of interior air space give you superior air quality and ventilation.

CLEARSPAN INTERIOR
With no interior columns, movement throughout the interior is easy for vehicles and equipment.

LIGHT
Naturally bright interiors create comfortable environments and help reduce energy costs.

QUALITY
Constructed from quality North American steel and engineered to comply with the most current building codes.

RETURN ON INVESTMENT
Our structures provide large, bright, secure spaces with reduced operating and maintenance costs.

Britespan buildings can be added onto existing Cover-All Buildings
