

Case Study

CUSTOMER NAME: British Columbia Oil & Gas Company
BUILDING SIZE & SERIES: 60' x 130' Apex Building Series
BUILDING USE: Equipment storage
AUTHORIZED DEALER: SpanMaster Structures Ltd.

British Columbia Oil & Gas Company

With one of the heaviest snow loads in British Columbia, one of Britespan's construction customers out of Terrace, BC required a building in a remote location that could withstand the snow load of 5.4Kpa. The building would be used as a warehouse for storing heavy equipment used to build a future pipeline. This customer decided the right building solution for the remote site was a 60' x 130' Apex Building Series on a solid row of concrete blocks.

“Britespan and our dealer were able to ensure the rigorous standards and guidelines of the operating company were met prior to the construction. Structural drawings and letters of assurance regarding the process and schedule were supplied.”

With one of the heaviest snow loads in British Columbia, one of Britespan's construction customers out of Terrace, BC required a building in a remote location that could withstand the snow load of 5.4Kpa. The building would be used as a warehouse for storing heavy equipment used to build a future pipeline. This customer decided the right building solution for the remote site was a 60' x 130' Apex Building Series on a solid row of concrete blocks.

Under permit conditions, the block foundation and structure was built on a compacted gravel pad. By using the block foundation, Britespan was able to provide the customer with a building that had little to no environmental impact on the site, should the operations decide to move the building to another location. The building could be deconstructed and removed without any lasting changes to the land, its surroundings, or the environment.

“Britespan and our dealer were able to ensure the rigorous standards and guidelines of the operating company were met prior to the construction. Structural drawings and letters of assurance regarding the process and schedule were supplied,” says the company representative. “Our dealer provided us with a complete and turnkey building ready for use with a construction timeline of 10 days from start to finish.”

Building Series

Britespan has been in the fabric building industry since 1994, offering the widest product line available today. We design, engineer and manufacture each product line in-house.

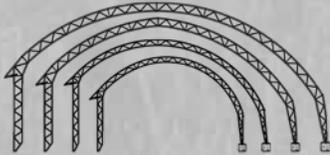

Our structures are engineered to be portable, temporary or permanent, with rapid installs even in remote areas.

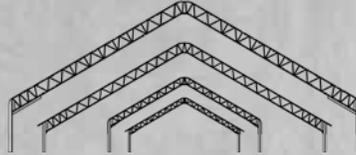

Atlas Series
24' - 108' wide

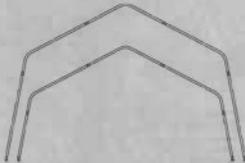

Genesis Series
80' - 200' wide

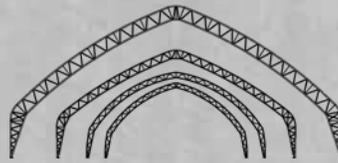

Easy Access Series
38' - 67' wide

Epic Series
80' - 120' wide

Accent Series
26' - 32' wide

Apex Series
53' - 100' wide

Rigid Beam Series
Up to 300' wide

Custom eaves, heights and slopes available

Custom Fabric Colours Available

Contact us for details on our full line of colour options or to request fabric samples.

Why Britespan?

HOT DIP GALVANIZING

Post-weld hot dip galvanizing bonds to steel to provide lifelong corrosion resistance from the inside out.

VENTILATION

Large volumes of interior air space give you superior air quality and ventilation.

CLEARSPAN INTERIOR

With no interior columns, movement throughout the interior is easy for vehicles and equipment.

LIGHT

Naturally bright interiors create comfortable environments and help reduce energy costs.

QUALITY

Constructed from quality North American steel and engineered to comply with the most current building codes.

RETURN ON INVESTMENT

Our structures provide large, bright, secure spaces with reduced operating and maintenance costs.

Britespan buildings can be added onto existing Cover-All Buildings
