

Case Study

CUSTOMER NAME: Brian Weidner
BUILDING SIZE & SERIES: 52' x 210' Atlas Building Series
BUILDING USE: Growing/finishing barn
AUTHORIZED DEALER: Effingham Animal Health Center, Inc.

Brian Weidner Growing/Finishing Barn

Weidner runs a 120-cow/calf herd, owns 400 acres of his own, along with renting about the same number of acres. Although not a big operator by today's standards, but the Weidner farm has continually expanded. With the cow/calf operation continuing to grow, Weidner needed to add more shelters.

“I looked at a lot of choices, but after researching the many types, I always kept coming back to the Britespan series. I started planning in September and by February, construction was completed.”

Weidner runs a 120-cow/calf herd, owns 400 acres of his own, along with renting about the same number of acres. Although not a big operator by today's standards, but the Weidner farm has continually expanded. With the cow/calf operation continuing to grow, Weidner needed to add more shelters. “The cowherd outgrew their current shelters, so in 2012, I made the decision to erect another shelter. I looked at a lot of choices, but after researching the many types, I always kept coming back to the Britespan series. I started planning in September and by February, construction was completed.”

Weidner chose to go with a 52' x 210' building used for growing/finishing cattle. Inside, there is a feed bunk on one side, 14' scrape alley, bedpack in the back, 5' eave over the feedbunk, 4' eave on the other side, along with some storage in the building and automatic waters.

Weidner has found a lot of positives over the past two years. “The lighting is good. Even on cloudy days and up until it starts to get dark, there is plenty of lightning. Proper ventilation is extremely important with the heat of summer and cold of winter, and the buildings provide the ventilation to help offset these temperature extremes.”

Although the building is only two years old, Weidner is impressed with the durability of the Atlas series. “Everything I read was positive. The company has a good track record; the building is built to last. It didn't take long to put up. The building is so efficient, but at the same time, the concept is so simple.” Weidner is now exploring the idea of adding another Britespan structure. “I would use this one more as a storage building.”

Building Series

Britespan has been in the fabric building industry since 1994, offering the widest product line available today. We design, engineer and manufacture each product line in-house.

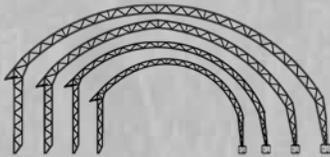

Our structures are engineered to be portable, temporary or permanent, with rapid installs even in remote areas.

Atlas Series
24' - 108' wide

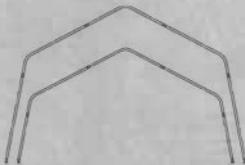

Genesis Series
80' - 200' wide

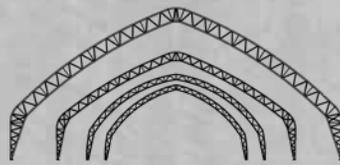

Easy Access Series
38' - 67' wide

Epic Series
80' - 120' wide

Accent Series
26' - 32' wide

Apex Series
53' - 100' wide

Rigid Beam Series
Up to 300' wide

Custom eaves, heights and slopes available

Custom Fabric Colours Available

Contact us for details on our full line of colour options or to request fabric samples.

Why Britespan?

HOT DIP GALVANIZING
Post-weld hot dip galvanizing bonds to steel to provide lifelong corrosion resistance from the inside out.

VENTILATION
Large volumes of interior air space give you superior air quality and ventilation.

CLEARSPAN INTERIOR
With no interior columns, movement throughout the interior is easy for vehicles and equipment.

LIGHT
Naturally bright interiors create comfortable environments and help reduce energy costs.

QUALITY
Constructed from quality North American steel and engineered to comply with the most current building codes.

RETURN ON INVESTMENT
Our structures provide large, bright, secure spaces with reduced operating and maintenance costs.

Britespan buildings can be added onto existing Cover-All Buildings
