

Case Study

CUSTOMER NAME: Tony Snow, Snow Dairy
BUILDING SIZE & SERIES: 70' x 140' Atlas Building Series
BUILDING USE: Compost bedded pack barn
AUTHORIZED DEALER: Effingham Animal Health Center, Inc.

Snow Dairy Compost Bedded Pack Barn

Snow Dairy is comprised of 140 Brown Swiss milk cows along with another 140 head of heifers and calves. In 2004, Snow introduced a grazing program and began to see their expenses cut dramatically. "Grazing is about cutting expenses. Yes, the gross numbers will obviously decrease, but we have found that by using a variety of forages we can increase animal health and really cut our veterinary costs. It's about efficiency and health of the cattle and cutting costs. We haven't fed corn on this farm for seven years, and we're happy with the choice that we made."

“Because these buildings are considered portable buildings, our insurance costs and our real estate taxes are significantly lower. Plus the quality and construction make the buildings affordable.”

Snow Dairy is comprised of 140 Brown Swiss milk cows along with another 140 head of heifers and calves. In 2004, Snow introduced a grazing program and began to see their expenses cut dramatically. “Grazing is about cutting expenses. Yes, the gross numbers will obviously decrease, but we have found that by using a variety of forages we can increase animal health and really cut our veterinary costs. It’s about efficiency and health of the cattle and cutting costs. We haven’t fed corn on this farm for seven years, and we’re happy with the choice that we made.”

For the Snows, the bottom line is efficiency, productivity and cutting costs. That’s why over the years they have replaced their traditional metal buildings with fabric structures.

In 2010, a 70’ x 120’ was added followed by a 70’ x 140’ Britespan Atlas building series that sits back to back with the 120’ building. These two barns are used as a compost bedded pack barn. The 140’ building was put up in 2011 on 24” poured concrete pillars. These pillars are 7½ ft out of the ground, which allows unrestricted access the entire length of the barn. By doing this the 140’ building was 3 ft taller than the 120’ building. “We use manure and cornstalks to create a compost pile. Through the winter, I take a nine-foot chisel plow and stir the cornstalks with the manure. By September, it’s just like sawdust and perfect to put on the pastures and hay fields,” says Snow.

“Because these buildings are considered portable buildings, our insurance costs and our real estate taxes are significantly lower. Plus the quality and construction make the buildings affordable,” says Snow.

Building Series

Britespan has been in the fabric building industry since 1994, offering the widest product line available today. We design, engineer and manufacture each product line in-house.

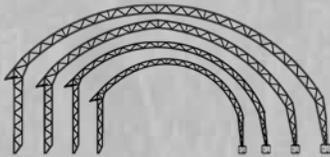

Our structures are engineered to be portable, temporary or permanent, with rapid installs even in remote areas.

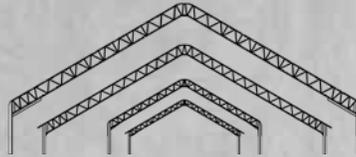

Atlas Series
24' - 108' wide

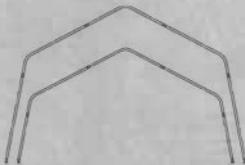

Genesis Series
80' - 200' wide

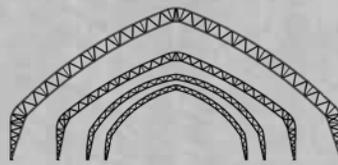

Easy Access Series
38' - 67' wide

Epic Series
80' - 120' wide

Accent Series
26' - 32' wide

Apex Series
53' - 100' wide

Rigid Beam Series
Up to 300' wide

Custom eaves, heights and slopes available

Custom Fabric Colours Available

Contact us for details on our full line of colour options or to request fabric samples.

Why Britespan?

HOT DIP GALVANIZING
Post-weld hot dip galvanizing bonds to steel to provide lifelong corrosion resistance from the inside out.

VENTILATION
Large volumes of interior air space give you superior air quality and ventilation.

CLEARSPAN INTERIOR
With no interior columns, movement throughout the interior is easy for vehicles and equipment.

LIGHT
Naturally bright interiors create comfortable environments and help reduce energy costs.

QUALITY
Constructed from quality North American steel and engineered to comply with the most current building codes.

RETURN ON INVESTMENT
Our structures provide large, bright, secure spaces with reduced operating and maintenance costs.

Britespan buildings can be added onto existing Cover-All Buildings
