

Britespan

BUILDING SYSTEMS INC

Commercial Building Solutions

Warehousing, Manufacturing, Equipment Storage & Workshops

Britespan offers the widest product line in the fabric building industry, with engineered structures from 24' to 300' wide to any length. We provide building solutions for every application that are efficient to build and have lower ongoing operating costs than traditional buildings.

Britespan's authorized dealers are industry experts and local to our customers, providing project management from concept to completion.

Economical Building Solutions & Reduced Maintenance Costs

Britespan buildings have a clearspan interior for maximum storage capacity and offer economical building solutions that help increase the bottom line.

Britespan fabric buildings are a fast, economical solution for every commercial building need. Common building uses include workshops, warehousing, equipment storage, processing and maintenance facilities, and manufacturing facilities. Our fabric structures provide extraordinary clearance for access, ease of movement, and loading and handling. There are no interior columns to interfere with bays, trucks, or heavy machinery.

Britespan's non-corrosive tension fabric roof system has a tremendous rip, tear and puncture strength. The fabric covers also allow for bright natural light, creating a safe working environment for crews working inside the building.

Choosing a Britespan fabric building means your business can gain the benefits of increased storage space or operational manufacturing space sooner, as they are often constructed in a fraction of the time than conventional buildings.

Britespan has designed and engineered custom fabric buildings for every industry, from custom widths, heights, foundations, entrances and openings and more.

Building Accessories

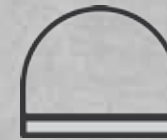

Doors

Multiple door styles are available, and can be installed at end or side walls to permit the proper traffic flow.

Insulation

If you require an insulated fabric structure, we offer competitive insulation packages for all of our building series.

Foundations

A variety of engineered foundation options available that can either be permanent, temporary, or entirely portable.

Engineering

Our buildings are engineered to comply with all North American and International building codes.

End Walls

End walls can be configured in a wide variety of options including full fabric, partial end walls, steel clad, wood finished and more.

Graphics & Logos

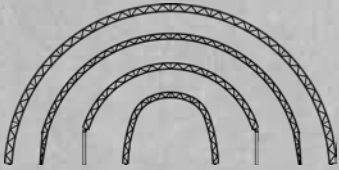

Buildings can be made uniquely your own with custom decals added to your building, nothing is too big or small!

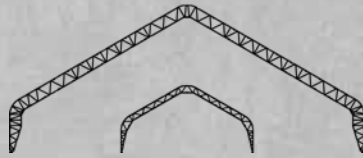

Building Series

Britespan has been in the fabric building industry since 1994, offering the widest product line available today. We design, engineer and manufacture each product line in-house.

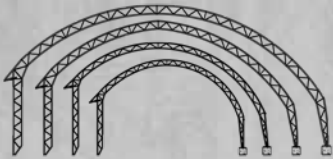

Our structures are engineered to be portable, temporary or permanent, with rapid installs even in remote areas.

Rigid Beam Series
Up to 300' wide

Custom eaves, heights and slopes available

Custom Fabric Colours Available

Contact us for details on our full line of colour options or to request fabric samples.

Why Britespan?

HOT DIP GALVANIZING

Post-weld hot dip galvanizing bonds to steel to provide lifelong corrosion resistance from the inside out.

VENTILATION

Large volumes of interior air space give you superior air quality and ventilation.

CLEARSPAN INTERIOR

With no interior columns, movement throughout the interior is easy for vehicles and equipment.

LIGHT

Naturally bright interiors create comfortable environments and help reduce energy costs.

QUALITY

Constructed from quality North American steel and engineered to comply with the most current building codes.

RETURN ON INVESTMENT

Our structures provide large, bright, secure spaces with reduced operating and maintenance costs.

Britespan buildings can be added onto existing Cover-All Buildings
