

HAY & STRAW STORAGE

BUILDING SOLUTIONS

Keep your hay and straw protected from the elements.

High-quality hay is a valuable commodity that you work hard to produce. But off-season weather or sunlight can undo your efforts. A durable, well-ventilated prefab barn from Britespan controls moisture build-up inside your hay barn, keeps the crop dry, and helps maintain its quality.

Column free-interiors and additional cubic storage height allow you to store more hay and straw while easily operating large equipment, machinery, and hay bale conveyors.
