

COMPOST

BUILDING SOLUTIONS

High capacity buildings to process organic waste into compost.

The commercial compost industry has been growing in recent years as more businesses and communities seek sustainable solutions for managing organic waste and reducing their environmental impact. Compost produced by commercial facilities must meet strict regulatory standards for quality and safety

Britespan buildings are highly functioning and easily customizable with an array of options such as extra high sidewalls and legs, a variety of door sizes and styles, various foundation types, custom portals, openings and lots more.
